

CS501 Homework 12

Name: Juilee Panse

ID: 19535

Q6: Use Dijkstra's Algorithm to find the shortest path of the following maze.

[illegible]

✓: the current visiting node

✓: the next node to visit

✓: this node has been visited

stop when destination node E is reached

so therefore the distance from S to E is 18

$S \rightarrow B \rightarrow C \rightarrow D \rightarrow F \rightarrow X \rightarrow E$
